

WASH, RINSE,
AND WALK AWAY!®

DON'T JUST TAKE OUR WORD FOR IT!

"If you are a home guy and you have a small garage . . . this (CR Spotless System) is something that is eminently practical and pretty simple. Just wheel it out from your garage and you are done."

- Jay Leno

"...purifies water so exhaustively that it could be used for satisfying medical experiments on garage mice. After the purifier arrived, a nice person from CR Spotless emailed, asking if my truck was "shinny."

"Shinny and turdless," I responded."

Car & Driver Magazine, 2015

"If you're the owner of a big RV, this one's for you. Keep that rig free of road grime and crud with the Spotless RV washer for home use or when you're on the road. The system uses (a proprietary ionizing process) that eliminates spots (without towel drying)."

The Examiner, 2015

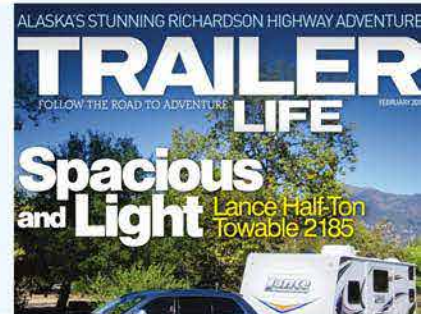

"This Spotless car wash system helped our car dry quickly and without streaks."

Automobile Magazine, 2015

"Accepted for full feature by the Editor in his Hands-On personal Review. Via phone they stated, "Wow this thing is absolutely amazing! WOW!"

Trailer Life Magazine, 2015

"I didn't need a CR Spotless Water Systems Deionizing water filter deal, but now that I have one it's hard to see how I could go on living without it. Amazing, really. Even the rubber ooked somehow better than usual."

Motorcycle.com, 2015

"Walk away and come back two hours later to a clean, spot-free airplane. There is no drying necessary, including those notoriously difficult windscreens. It's also great for washing cars, motorcycles, windows, and anything else you can think of that needs to be spot free. Users will not be disappointed."

AOPA, 2015

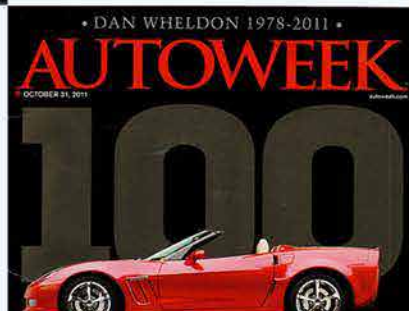

"And here's the coolest part . . . with their system you can wash/rinse your bike without the need to (towel) dry it after." As promised the de-ionized water left little to no hard water spots, whereas the hose water most definitely did. So the CR Spotless Water System works as advertised." Motorcyclist.com

"At this point, the skepticism in the office was growing. Drying time was short because it was a sunny day with a nice breeze; it only took about half an hour. Alas, no spots! It was dry and spot- and streak-free!"

AutoWeek Magazine, 2015
